

# ARCHIVES of ACOUSTICS

QUARTERLY, Vol. 47, No. 1, 2022

## Review Paper

- B. Szttyler, P. Strumiłło, *Acoustic metamaterials* ..... 3

## Research Papers

- D. Reis, J. Miranda, J. Reis, M. Duarte, *Optimization system to minimize exposure to occupational noise* ..... 15
- F.N. Gaafer, *Perfect absorption for modulus-near-zero acoustic metamaterial in air or underwater at low-frequency* ..... 25
- R.F. Madvari, M.N. Sharak, M.J. Tehrani, M. Abbasi, *Estimation of metal foam microstructure parameters for maximum sound absorption coefficient in specified frequency band using particle swarm optimisation* ..... 33
- L. Liang, S. Chen, P. Li, *A rattle signal denoising and enhancing method based on wavelet packet decomposition and mathematical morphology filter for vehicle* ..... 43
- S.-N. Yao, *Influence of loudspeaker configurations and orientations on sound localization* ..... 57
- B. Mróz, B. Kostek, *Pursuing listeners' perceptual response in audio-visual interactions – headphones vs loudspeakers: A case study* ..... 71
- L. Yu, S. Qiao, W. Shou, J. Li, *Calculation for acoustic radiation force from rectangular weakly focusing transducer using the ray acoustic model* ..... 81
- S.P. George, J. Isaac, J. Philip, *Electrode mass loading effects on different piezoelectric substrates for SAW delay lines: A comparative FEM analysis* ..... 89
- S.N. Balireddy, J. Pitchaimani, L.B. Mailan Chinnapandi, V.S.N.R. Chintapalli, *Acoustic response of an isotropic beam under axially variable loads using Ritz and Rayleigh integral methods* ..... 97
- V.S. Sreejith, N. Tiwari, *Design sensitivity studies on a hydroacoustic projector using an experimentally validated easy-to-build model* ..... 113

## Technical Note

- R. Makarewicz, *Proposed methodology for the annoyance penalty of amplitude modulated wind turbine noise* .... 125
