

Bulletin of the Polish Academy of Sciences Technical Sciences (BPASTS)

volume 73, no. 6

November 2025

CONTENTS – Regular Articles

Civil Engineering

BIM implementation in urban infrastructure design and education

Paweł Hawryszków, Marta Knawa-Hawryszków, Diogo Ribeiro

A universal algorithm for spur gear optimization based on selective search: Numerical methodology and applications

Piotr Strojny

Control, Informatics and Robotics

Condition Monitoring of Pick-and-Place Robots Using IIoT-Based Data Acquisition Systems

Marcin Korzeniowski, Bartosz Tarkowski

Comparison of calculation times of FOPID and PID controllers along with control quality for Two Rotor Aerodynamical System

Jakub Żegleń-Włodarczyk

Artificial and Computational Intelligence

A convolutional neural network based on MSCAM for intelligent diagnosis of ball screws

Qin Wu, Jianxiong Li, Xinglian Wang

Electronics, Telecommunication and Optoelectronics

Fast data transmission with FPGAs for implementation in ALICE FIT detector in CERN

Radosław Feiglewicz, Andrzej Kos, Paweł Russek, Sebastian Koryciak

Mechanical and Aeronautical Engineering, Thermodynamics

Analysis of a novel vertical axis twin-rotor wind turbine performance in an urban environment

Shivangi Sachar, Piotr Doerffer, Paweł Flaszyński, Krzysztof Doerffer, Joanna Grzelak, Andrzej Reiter

Material and technological concept of the construction of a turboshaft engine with the application of isochoric combustion – CFD thermal analysis

Piotr Tarnawski

Research on the causes of erroneous forecast generated using the Chapman-Kolmogorov equations for the process of vehicle operation

Jarosław Ziółkowski, Aleksandra Łęgas, Mateusz Oszczypta, Jakub Konwerski, Jerzy Małachowski

Studies of energy absorption of lattice structures manufactured from PETG filament with FFF 3D printing

Mateusz Banaszek, Paweł Baranowski, Paweł Płatek, Marcin Sarzyński, Kamil Cieplak

Experimental testing of a rocket motor thrust vector control actuation system demonstrator

Łukasz Nocoń, Krzysztof Szmidt

Acoustic characteristics of DU96-W-180 airfoil at low-Reynolds number

Thanushree Suresh, Oskar Szulc, Paweł Flaszyński
