

# Bulletin of the Polish Academy of Sciences Technical Sciences (BPASTS)

volume 74, no. 1 January 2026

## CONTENTS – Regular Articles

### Artificial and Computational Intelligence

**Data structure better than labels? Unsupervised heuristics for SVM hyperparameter estimation**

Michał Cholewa, Michał Romaszewski, Przemysław Głomb

**Towards sustainable wireless rechargeable sensor networks: a federated multi-agent reinforcement learning approach for cooperative wireless charging**

C.N. Vanitha, P. Anusuya

### Civil Engineering

**Production of environmentally friendly, sustainable insulation material: Fly ash-based geopolymer**

Evren Arioiz

**Silane-based injection methods for moisture protection in ceramic bricks**

Natalia Szemiot-Jankowska, Anna Hoła

**Wave-shaped wire extensometer for linear displacement measurement**

Elżbieta Matus

**Synergistic effect of additives on reducing asphalt binder aging**

Mateusz Marek Iwański, Małgorzata Durlej, Karolina Janus

**Evaluating geometric quality and accuracy of 3D building models: a concept of 3D model evaluation method**

Przemysław Kłapa

**Seasonal and predictive analysis of transport fleet availability and reliability using long-term operational data**

Patrycja Guzanek, Anna Borucka

**Development of low-emission photocatalytic cement composites with co-ground TiO<sub>2</sub>-fly ash and TiO<sub>2</sub>-calcium carbonate systems**

Agnieszka Ślosarczyk, Izabela Kłapiszewska, Patryk Jędrzejak, Marta Thomas, Łukasz Kłapiszewski

### Control, Informatics and Robotics

**Experimental performance analysis of an AMR controlled by a hybrid MPC-PID method**

Murat Orkan Celik, Murat Koseoglu, Furkan Nur Deniz

**Fault detection method for DFIG based on particle swarm optimized sliding mode observer**

Tingting Xie, Hongwei Zhang, Chenjia Ni

**Dynamic event-triggered sliding-mode fault-tolerant bipartite consensus control for multi-agent systems based on adaptive observer**

Xingjian Fu, Dexian Xia

**An approximate analytical solution of the gear meshing problem based on MSM using DynPy Python library**

Krzysztof Twardoch, Krzysztof Kaczmarzyk, Grzegorz Długopolski, Bogumił Chiliński

**Predictive algorithms for determining blowing pressure in a pipe organ**

Damian T. Węgrzyn, Piotr Wrzeciono, Alicja A. Wieczorkowska

**High-performance control of permanent magnet synchronous motor using a finite-time sliding mode observer and super-twisting algorithm**

Jing Nie, Yong Li, Gang Li

### Mechanical and Aeronautical Engineering, Thermodynamics

**The effect of the deformation of the face throttle surface on the operation of the balancing disk of a multistage centrifugal pump**

Yuliia Tarasevych, Nataliia Sovenko, Kinga Chronowska-Przywara

**An assessment of the intensity of extension-bending coupling and its effect on the stability of a thin laminate plate**

Monika Zaczynska, Mehdi Bohlooly Fotovat, Zuzanna Kaluzna

**Aerodynamic performance optimization of a vertical-axis wind turbine using blade-spoke connection and pitch angle via the Taguchi method**

Himmet Erdi Tanürün

**Improved snake optimization algorithm for parameter identification based on the genetic algorithm**

Baolu Yang, Liangming Wang, Jian Fu

**On compliance minimization by biomimetic regularization method**

Michał Nowak, Jan Sokołowski, Antoni Żochowski, Jan Polak

**Decibel scale sensitivity in analyses of environmental acoustic risks**

Wojciech Batko, Leszek Radziszewski, Andrzej Bąkowski
